

# Electrodermal Screening

*getting to the source with energetics*

**ELECTRODERMAL SCREENING (EDS)  
IS AN EXCITING, NON-INVASIVE, NON-  
MEDICINAL APPROACH FOR MAINTAINING  
MAXIMUM HEALTH.**

EDS works by measuring the electrical/energy resistance at various points on the body called meridians. This energy permeates every cell and flows through the meridians relating to every system and organ of the body. When this flow is hindered or blocked, EDS sends back a frequency to the computer screen indicating where the level of resistance is located. Think of this being similar to traveling (energy flow) on a road (meridian) when you encounter a tree lying across the road (toxin/nutrient deficiency). You are now hindered from moving forward; your journey has stopped (energy blockage, symptoms). You then call 911 who sends someone to remove the obstacle (signaling your body to heal itself through supplements) and you continue unobstructed toward your destiny.

The electrical flow is measured when the person being screened holds a device carrying a negative charge while the health professional uses a probe with a positive charge. This provides a closed circuit that allows the electrical frequency to move from the practitioner's probe to the client's device, and then to the computer giving a reading of the amount of electrical resistance flowing through the meridian points: much like the EKG and Cat scan technology, but without the radiation. The amount of electricity is so small that you don't have to worry about any harm from it. Even children can be screened without

*“It was as if I woke up one day and I couldn't be with people. Among other things, the doctors labeled me with General Anxiety Disorder (GAD). The doctor told me I would never work again, should file for disability, and would probably be on medication the rest of my life. After going through Health Clean's protocol for eight months, I was back to work, never took any medications, and am now a pastor leading a Church in West Virginia. The doctor I was required to see was amazed and told my wife and I: “Do you realize that you and your husband proved all of UPMC wrong?”*

*--Dave W., West Virginia*

concern.

The EDS device is calibrated so that a reading of 50 is good, meaning no hindrance or blockage coming from the cells. When a meridian point is hindered or blocked, it reflects either a reading under fifty, revealing a moving toward degeneration, or over fifty, reflecting a moving toward inflammation.

## Symptoms, But No Cause Found

You have most likely found yourself, or someone you know, having symptoms that are a mystery to your health professional. This is not uncommon and is the norm rather than the exception. Most traditional methods identifies an area only after large sections of tissue are damaged, like identifying a car accident after it happens or a cancer after it's big enough to be cut or lasered out or arthritis after its intensity releases pain and dysfunction. The good news is that EDS helps to detect any imbalances in electrical energy before the tissue is adversely affected and symptoms develop. It is important to keep in mind that before a symptom or disease is identified by traditional methods, it has already developed undetected for a period of time. The symptoms and disease are the result of undetected sleuths working diligently to destroy your health. EDS helps to detect these sleuth's before they do their damage.

## The Undetected Sleuths

These sleuths actually fall into two categories: toxins and nutrition deprivation. Toxins are nothing more than anything that is brought into your body that cannot be absorbed as nutrition or eliminated as waste. The toxins then attaches to your cells, hindering cellular function; EDS detects this hindrance, however minute. Once detected, the cell can be detoxified before major symptoms appear. Nutritional deprivation is nothing more than your cells not receiving the necessary nutrition to function as it should. The result is the degeneration of cells and eventually symptoms and disease. Once identified, the cell can be replenished with needed nutrients. The goal is to clean the inside of your body. Even as the surface of your body needs cleansed on a regular basis, so does the inside of your body.

## Balancing the Imbalances

After the causes of the imbalances are identified, we work with you to bring balance using whole-food supplements, herbals, enzymes, homeopathies, and lifestyle changes. We also test your protocol to ensure that they support a balanced state.

## Our Goal

Our goal is to help you renew your cells so that they are free of toxins and thriving with nutrition. A healthy cell is a healthy body. Our overall philosophy is that there is really only one disease: malfunctioning cells, and there are only two reasons that cells malfunction: toxicity and nutritional deprivation. Our goal is to help you to live healthy because you are healthy clean from the cell outward.

## Services Offered

*supporting your body's  
natural healing process*

### COMPREHENSIVE FULL BODY SCREENING

Assessing each of the body's systems to determine where imbalances in energy flow are. Supplements are then tested to determine what is needed to return the body to balance.

### TOXICITY EVALUATION

Identifies the toxicity level affecting your cells and the supplements to support cellular health.

### NUTRITIONAL EVALUATION

There are few people not deficient in vitamins, minerals, enzymes, and other nutritional necessities. We evaluate what your body is lacking and help you to rebuild your nutritional foundation.

### SUPPLEMENT COMPATIBILITY

How do you know that the supplements you are taking are really needed by your body? If you have not been tested, you are like a hunter shooting rabbits in the dark. We test all your supplements to ensure compatibility with your body.

### ALLERGY SCREENING

We do two types of testing: One for **food allergies** and another for **environmental allergies** (pollen, mold, dander, etc.)

### SYMPTOM SCREENING

Evaluation of a client's identified symptom to determine imbalances and recommended supplements.

### STRESS SCREENING

Development of an individualized protocol to assist with daily stress.

### HORMONAL SCREENING

An individualized protocol is developed for men and women to help keep hormones in balance.

### NO WE DON'T, BUT...

No, we don't diagnose disease, but we do detect imbalances in the electrical/energy flow running through the meridians. When this flow is hindered or blocked, the body works to heal itself. When it is hindered in the repair process by toxins or lack of nutrition, symptoms of sickness and disease appear. Our goal is to remove the hindrances preventing the body from healing itself.

## YOU DON'T HAVE TO **JUST LIVE WITH IT**

A first time initial visit with our Bioenergetics Practitioner includes a comprehensive full body screening to determine where the energy imbalances, due to toxicity and nutritional deficiency, are located. We then develop an individualized protocol to work with your particular imbalances.

A large portion of our clients were not able to find solutions for their health issues, and many were told they would "just have to live with it." We are finding that no one has to "just live with it." There is a solution. There is hope. There is Electrodermal Screening.

Schedule your appointment today.

**HEALTH CLEAN, LLC**  
*Living Healthy...Healthy Clean*

POSTAGE

265 Shoaf Road, Smithfield, PA 15478

Symptoms that may be due to toxicity and nutritional imbalance include: allergies, arthritis, asthma, depression, digestive disorders, eczema, fatigue, fibromyalgia, headaches, hormone imbalances, hyperactivity, ADD, infections, lyme, PMS, prostate problems, respiratory infections, sinusitis, ulcers.
